

RIPPER

The Ripper is for the smaller protector of the lands, mountains and forests. Based on our Ranger model, the Ripper is just as anxious to explore and eager for the challenges ahead.

Featuring the same quality as our larger bikes, the Ripper is for the smaller rider who is eager to explore the outdoors. Sized specifically for riders under 5'6" tall, the Ripper is the real deal in a smaller 20" fat-tire wheel size.

The Ripper will be offered as a single-speed drivetrain, with a geared upgrade kit available.

The Ripper is available in a 500W motor.
